

Academic Integrity and Artificial Intelligence (AI²) Assessment Scale

School of Communication and Literary Studies, FHASS

	ACCEPTABLE USE OF ARTIFICIAL INTELLIGENCE SOFTWARE	BLOOM'S TAXONOMY LEVEL	SAMPLE ASSIGNMENT VERBS	ASSIGNMENT DESCRIPTION
1	NO AI	Creation <i>Produce new or original work</i>	Create, design, construct, conjecture, develop, formulate, investigate	The assessment is completed entirely without AI assistance. Students rely solely on their own knowledge, understanding, and skills. AI must not be used at any point during the assessment.
2	AI TASK COMPLETION, HUMAN EVALUATION	Evaluation & Synthesis <i>Justify a stance, decision, or opinion</i>	Evaluate, synthesize, appraise, judge, critique, reflect	AI is used to complete specific elements or content in the assignment, with students providing non-AI generated discussion or commentary. The assignment requires critical engagement with AI-generated product and evaluating its output. AI is used to complete specified tasks in the assessment, but students must do their own evaluations/synthesis of the AI content. Any AI-created content must be cited/acknowledged.
3	AI-ASSISTED GENERATION AND STRUCTURING	Analysis <i>Draw connections amongst ideas (generated by AI)</i>	Analyze, brainstorm, differentiate, generate, organize, relate, compare,	AI can be used during the process of the assessment for brainstorming, creating structures, generating ideas, and feedback for improving work. Students may be asked to submit any AI prompts used, drafts of their own work, and acknowledge how they used AI throughout the assignment. No AI content is allowed in the final product (the analysis), but AI may be used as a tool to assist students with the ideating process.

4	AI-ASSISTED EDITING	Application <i>Use AI generated tools/information in new situations or contexts</i>	Apply, use, implement, schedule, operate, execute, utilize	AI can be used to make improvements to the clarity or quality of student-created work to improve the final output, but some or all the ideas/content must be generated by the student. The student's original work (with no AI content or editing) may be requested by the instructor as an appendix to the final submission. The assignment may allow for AI-assisted editing (Level 4) in conjunction with Levels 1-3 of this chart, as specified by the instructor. AI may be used to refine the student's final product, but no new content should be created using AI.
5	FULL AI	Comprehension <i>Explain ideas or concepts</i> Knowledge <i>Recall facts and basic concepts</i>	Classify, describe, explain, discuss, identify, illustrate, report, show, translate Define, list, memorize, state, repeat, choose, find, select, tell, match, research	AI should be used as a 'co-pilot' in order to meet the requirements of the assessment, allowing for a collaborative approach with AI and enhancing creativity. Students will be assessed on the overall quality of the final product/assignment. Students may use AI throughout all aspects of the assessment to support their own work and do not have to specify which content is AI generated.

This chart has been created by Julie Warkentin (2024), and is adapted in part from the following sources:
