

COURSE DESCRIPTION: Students investigate biocultural approaches to the study of prehistoric, historic and contemporary health and disease patterns in order to understand the impact of evolution, culture change, and globalization on human health. Students examine the determinants of human health in the past and present from the perspectives of biological and medical anthropology. Students develop an understanding of the factors that are responsible for health and disease by engaging in interactive lectures, learning activities, discussions, and case studies. Evidence-based research and experiential learning opportunities, challenge students to think critically about health issues that are affecting human populations, shared determinants, as well as differential factors that produce health outcomes.

****Please refer to the weekly schedule, assessments and deadlines posted in *THIS* course schedule, NOT the Sheridan 'Course Outline' posted on the SLATE toolbar.** Some changes have been made to the course, so the schedule and evaluations may differ.

14	Dec 14	Module 10	Complete, review, reflect			All module quizzes complete

** The dates listed above may change in order to suit our class. All changes will be announced on SLATE; however, it is your responsibility to keep updated on all changes.

IMPORTANT NOTES for SUBMITTING ASSIGNMENTS:**1. FORMAT:**

- All assignments must be formatted according to **APA Style Guide (7th Edition)**.
- Assignments that do not meet APA expectations will be penalized.
- Students are expected to acknowledge the sources of all information (paraphrases, quotations and summaries) using **APA in-text citations, and bibliography**.
- Assignments that do not include appropriate citations and a bibliography may receive a zero.

2. ASSIGNMENT DEADLINES:

- Late assignments will be penalized 10% per day (up to 5 days). After 5 days, assignments may not be accepted.
- Extension requests (for medical or compassionate grounds) may be granted on a case-by-case basis, but requests, must be made before the assignment deadline.

3. ACADEMIC INTEGRITY:

Sheridan is committed to academic honesty and integrity. Students are responsible for familiarizing themselves with Sheridan's Academic Integrity Policy and ensuring that the work they submit in this course is consistent with the principles of academic integrity:

- **The principles of academic integrity** require that students spend sufficient time completing each Module and that all work submitted for evaluation and course credit be the original, unassisted work of the student for the current course.
- Violations of Academic Integrity, including cheating or plagiarism, borrowing, copying, purchasing or collaborating on work, except for group projects arranged and approved by the faculty member, using generative AI (including but not limited to ChatGPT) or otherwise submitting work that is not the student's own, will be penalized as detailed in Sheridan's [Academic Integrity Policy](#).

4. USE OF COURSE MATERIALS:

The materials provided in this course are protected by copyright, are intended for your own educational use and should not be share on communication channels or websites, such as Course Hero or OneClass. Unauthorized distribution constitutes a violation of Sheridan policies. Use of Anthropology of Health course content in assignments should be cited appropriately following APA guidelines.

*In this course students are required to use **Copyleaks** to check their own written work to ensure originality. Students will have the opportunity to review their work and correct any issues identified by **Copyleaks before** submitting their final assignments.*
